

Comparative analysis: HUMAScoin vs traditional currencies

Parameter	HUMAScoin	Traditional Finance / Cryptocurrencies
Foundation	Human energy (1 HUNIT = 1 kWh)	Money, computing power, speculation
Acquisition	For contribution, participation, energy	Through labor, trading, mining
Usage	Internal: payments, motivation, accumulation. In the future — trading and storing.	Spending, speculation, storage
Environmental impact	No mining, energy is preserved	Energy-consuming, network load
Transparency	Linked to real energy and contribution	Depends on platform, often abstract
