

# **Tokenomics of HUMAS System**

### **General Structure**

HUNIT (hu) is the base unit of human energy:

1  $\mu$  hu = 1 kWh. It is non-transferable and non-tradeable. It serves as the foundation for measuring personal contribution, generating value, and validating identity.

HUMAScoin (HUMSX) is a circulating unit of value created through accumulated human energy and validated via glyph signature.

The conversion follows the Golden Ratio coefficient of 2.618:

1 HUNIT ≈ 2.618 HUMAScoin.

## Total Supply: 8,000,000,000 HUMAScoin

Category	Amount	Share
Listing & Liquidity	40,000,000	0.5%
Development & Tech Foundation	2,000,000,000	25 %
Strategic Partnerships	1,200,000,000	15 %
Private & Public Rounds	1,600,000,000	20 %
Community / HUNIT Conversion	2,400,000,000	30 %
Stability & Reserve Fund	720,000,000	9 %
NFT Grants & Contribution Pool	40,000,000	0.5%

#### **Economic Model**

- HUMAScoin is issued in a limited supply and can only be generated based on energy contribution (via HUNIT).
- HUNIT is validated by participants and community validators irreversibly, through glyphbased confirmation.

#### HUMAScoin is used for:

- Registration and access to modules (HU-Translator, User Cabinet, etc.)
- Access to NFT-glyphs and in-system interaction
- B2B integrations and services
- Sponsorships and partnership engagements

HUMAScoin is partially burned upon usage, creating scarcity and value growth over time.
